-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

1. Claims 11-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 2/25/08.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-10 are rejected under 35 U.S.C. 102(b or e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Broselow (6,132,416) alone, cited by applicant, or especially in view Fischer (5,289,919), cited by the examiner. Broselow teaches various arrangements for delivering pre-determined dosages of medication as recited in claim 1, such as the cups of Fig 3. These have

indicia indicating the dosage to be delivered, since they are color coded according to a particular dose. However, Broselow may not teach an arrangement for organizing the delivery arrangements such as the cups, or the limitation wherein the organizing arrangement has the claimed corresponding indicia. On the other hand it is conventional to organize different cups and other medicine containers in an arrangement corresponding to the differences between the contents of the cups or containers. This is not the invention of applicant. For example, placing all red bottles on one shelf and green bottles on another is clearly not the invention of the applicant. See also bottles of soda on any store shelf. Thus it would have been obvious to provide the apparatus of Broselow with an organizing arrangement as recited in claim 1, to provide for convenient storage, as well as retrieval, of the desired cups or other containers of medication.

However, Fischer is cited for emphasis to show that it is conventional to store color coded syringe tips in containers that are color coded to match the syringe tip colors. Thus it would have been especially obvious in view of Fischer to make the modification above to Broselow, for the reason already noted. The apparatus of claim 6 clearly reads on the syringe of Broselow. Elements of the claims not disclosed in the references, but that are nevertheless conventional,

would have been obvious to provide to the apparatus of Broselow for the purpose of improving the same.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jacob K. Ackun Jr. whose telephone number is (571)272-4418. The examiner can normally be reached on Monday through Friday 8.30AM-5.00PM.
